North NJ Region Specific Rules

Scoring Gracious Professionalism for “No Show”

- If a team does not submit a robot run, this is the equivalent of a “no show” at an in person event.
- If there are technical difficulties and there is a good faith effort to work to resolve, then a score of **Accomplished** (3 pts) may be granted
 - To do this, leave every field in the event hub unmarked except the ‘Gracious Professionalism’ section
- If there is no intent by the team to submit a robot run, then a score of 0 pts will be recorded for the mach
 - To do this, submit a blank scoresheet in the event hub. This will count the Gracious Professionalism score as ‘0’

M10 Sorting Center Setup Instructions

- In your video, indicate which configuration number you are using for the sorting center for that mission according to the document linked below.
 - [M10 Setup Guide.docx](#)
- An Oct 21st game update requires that all 3 robot runs need to have different sorting center starting configurations.
- Please ensure that you clearly show the beginning configuration of the sorting center (zoomed in) before the actual robot round

Q&A

General

1. Question: Are we allowed to keep a sensor as part of the attachment and connect to the brick port while launching?

Answer: Please re-review R01 Equipment - that clearly explains what is not allowed. A general reminder also that unless something is specified as 'not allowed' then it can be done (R23 Direct Wording).

2.

M08 Air Drop

3. Question: Air drop: There is an update for airdrop which says if you are the only team in match you can start with food package in home and if you interact with the model you get points. Does it mean
- a) if the robot touches the air drop model you get points even though food package is not connected to air drop mission
 - b) We can start with food package at home

Answer: Please review the rules for M08 and Challenge Update 10. Remember that unless something is specified as 'not allowed' then it can be done (R23 Direct Wording).

M12 Large Delivery

1. Question: If the turbine blade is touching only the blue holder and: The mat: 20
Does it mean even if the turbine blade touches any part of mission model (even the bottom) do you get point ?

Answer: Please re-review the rules for M12. The conditions for scoring are clearly stated.

M15 Load Cargo

1. Question: While delivering cargo on ship mission, can teams put some thing under the swinging platform to stop swinging and deliver the cargo on top with out touching support.
In rulebook all it says is :
- If there are containers on and touching only the: Cargo Ship's West Deck: 30 each (Max 60 points)

Answer: Please review the general rules (that R1 to R26) again. Remember that unless something is specified as 'not allowed' then it can be done (R23 Direct Wording).

Note for Event Coordinators and Referees (do not share with parents/coaches - official response for them is above):

- No rule exists this year that penalizes leaving anything on the field. In addition, there is no restriction in the rules for M15 that something *can't* be used.
- Therefore, if equipment is left on the field to stabilize the platform, then it can be scored.

- The only watchout is R04, which states that “If you combine a model with anything (including the robot), the combination needs to be loose or simple enough that, if asked to, you could free the model in perfect original condition immediately.” This means that unless whatever is stabilizing the swing obviously can’t be removed without causing damage to the mission model, the mission can be scored.

Revision History

Version	Date Issued	Revision History
1	Oct 25, 2021	Initial Issue
2	Nov 3, 2021	<ul style="list-style-type: none">• Add Revision History section• Change details for M10 Sorting Center to align with Challenge Update issued on Oct. 21st (Update 11)• Added additional detail for how to score Gracious Professionalism for teams that do not submit a robot run• Added Q&A for question received for Equipment• Added references to R23 Direct Wording where applicable• Reference Challenge Update 10 in M08 Q #1
